

No.	Authors	Title
P1	Yuzuki Kitamura, Yosuke Kita, Yasuko Okumura, Masumi Inagaki, Hideyuki Okuzumi and Yuji Ishikawa	Effects of musical experiences on pitch discrimination: Differences among types of intervals
P2	Iwao Yoshino	Investigation of priming effect on chord recognition by tonality in chord context
P3	Akio Suguro and Masanobu Miura	Chord label estimation for musical acoustic signal using extended PCP with chord progression model
P4	(cancelled)	
P5	(cancelled)	
P6	Alexandre Celma Miralles and Juan M. Toro	Three spatial beats fail to elicit meter, but two lateralized beats succeed
P7	Alexandre Celma Miralles and Juan M. Toro	Musical training modulates meter induction in the spatial domain
P8	Chinami Onishi and Yoshitaka Nakajima	Dottedness of dotted rhythms tends to be underestimated subjectively
P9	Keita Yamazaki and Yoshitaka Nakajima	Discrepancies between notated rhythms and performed rhythms
P10	Shimeng Liu, Yoshitaka Nakajima, Yuko Yamashita and Miharu Fuyuno	Quantitative analysis of English public speaking presented by Japanese EFL learners
P11	Emi Hasuo and Sumi Shigeno	Effects of temporal and spectral structures on the perception of sound duration
P12	Takuma Matsumura, Shizuko Hiryu and Kohta Kobayasi	The rhythmic "consonance" of sound sequences affects the subjective consonance of component sounds
P13	Yoshimori Sugano	Crossmodal interaction of temporal attention to auditory and visual rhythms
P14	Hiroki Motoyama and Shinsuke Hishitani	Is detection of auditory stimulus facilitated during visual imagery generation?
P15	Toru Kamekawa and Atsushi Marui	The effect of rise time of the sound source on the sense of listener envelopment
P16	Syoya Yamaguchi and Masanobu Miura	Computational estimation of newness/oldness of music by time-varying parameters for Japanese women-idol music
P17	Kentaro Ono, Daiki Yamasaki, Christian Altmann and Tatsuya Mima	Electrophysiological evidence for early information processing in the illusionary perception of tone sequences
P18	Fumihito Imai, Kenji Ogawa, Jun-ichi Nihashi and Jun-ichi Abe	Neural representational similarity of individual finger movements: the study including a skilled piano player who suffered from focal hand dystonia
P19	Agata Żelechowska, Katarzyna Jednoróg, Anna Banaszkiwicz, Katarzyna Chyl, Agnieszka Dębska and Magdalena Łuniewska	Short-term extracurricular musical training is reflected in the brain structure and cognitive performance of primary school children
P20	Sachiyo Kajikawa and Hiromi Hiruma	Infant heart rate responses to music when accompanied by movement stimulation
P21	Hirokazu Doi, Ilaria Basadonne, Paola Venuti and Kazuyuki Shinohara	Men with high salivary testosterone level show decreased preference for sophisticated music
P22	Aena Yang, Shizuko Hiryu and Kota Kobayasi	"Chilling" me softly with his song: The neural mechanism of musical "chills"
P23	Kazuma Mori and Makoto Iwanaga	Support vector machine decodes two types of peak emotional responses to music

No.	Authors	Title
P24	Etsuko Hoshino	Perceptions and feelings of happiness and sadness induced by music: Relationships among emotion, liking and aesthetic responses
P25	Goncalo Barradas and Laura Sakka	The effect of lyrics on music-induced emotions: A comparison of Portuguese and Swedish listeners
P26	Tamaki Inada and Shin-ichiro Iwamiya	Optimal timing of music insertion at end of speech in Japanese visual media productions
P27	Kimiko Ohta and Keiko Arakawa	An analysis of dynamic and pitch variation in orchestra performance - Focusing on the performances of Harnoncourt
P28	Madoka Okemoto and Masanobu Miura	Proficiency estimation for violin performance using pitch and vibrato parameters
P29	Hanae Ono	Vibrato in 'Baroque singing': Today's singers' views and practice
P30	Jing Qi and Mayumi Adachi	The advanced pianist's sight-reading and discrimination skills: How do they relate to musical training, possibly bound to the country?
P31	Yuki Mito, Hiroshi Kawakami, Masanobu Miura and Yukitaka Shinoda	Relationship between performance motion of the grand piano and pianist by each emotion
P32	Tamaki Ando, Satoshi Obata and Eriko Aiba	Case study of string-pressing force and muscle activities during playing Japanese Koto
P33	Ayako Sakakibara	Process of acquiring absolute pitch: A procedure for dividing memory for chords into single tones
P34	Hiromi Takasu	Rhythmic characteristics of songs created by young children
P35	Satoshi Kawase and Jun'ichi Ogawa	The effects of children's group music lessons on the mood of accompanying parents
P36	Rafał Lawendowski and Michał Kierzkowski	Metacognitive self and the distinction between professional and amateur musicians
P37	Haruka Shoda, Ken-ichi Tabei, Jun Nakahara, Shoko Yasuda, Aaron Williamon and Tadao Isaka	Roles of daily musical and physical activities in quality of life and subjective well-being: A survey for Japanese university students
P38	Min Ah Kim	Review of music intervention on depressive symptoms in healthy elderly
P39	Manami Niiyama and Ruiko Natuume	Effect of music therapy on person with dementia : A review
P40	Myung Sun Yeo and Soo Ji Kim	Music-based voice protocol for swallowing function, phonation, and quality of life of patients with Parkinson's disease : A case study
P41	Eiichi Ueno, Nobuaki Maegawa and Jumpei Matsuura	The characteristic of research concerns of music therapy for 41 past years
P42	Jiyoung Sakong	Music interventions on psychological symptoms for breast cancer patients: A review of quantitative studies
P43	Ga Eul Yoo and Soo Ji Kim	Factor analysis of dyadic rhythm playing as a social motor skill of children with autism spectrum disorder
P44	Shuo Chen	The effect of chorus teaching on physical and mental health of children with mental retardation
P45	Yohko Shimada, Yasuko Funabiki and Yukuo Konishi	Shift of rhythmic vocalization in relation with change of activities: Analysis of vocalization of autistic children
P46	Yoo Jeong Kim	Review of the music interventions in pediatric palliative care
P47	Ting Huang, Yun Nan and Yu-Xuan Zhang	The mechanism of spoken word processing: Insights from congenital amusia
P48	Kazuo Ueda and Yoshitaka Nakajima	Demonstrations of locally time-reversed choral music in four different languages
P49	Nobuaki Maegawa, Eiichi Ueno and Jumpei Matsuura	Psychological meaning for rhymes of Japanese children's song
